wherever
you are*™

PREAMBLE

Thank you for your interest in our products. This catalogue will provide you with a selection of our comprehensive accessory programme.

The catalogue consists in two parts:

In **Part 1**, you will find various equipment components for your genset that can be ordered in addition to the standard equipment set. Please note that equipment components, unless stated otherwise, must be included in your order when purchasing the genset. The subsequent refitting is possible only if Fischer Panda has the pertinent upgrade kits available in their programme.

Part 2 contains our accessory programme. Fischer Panda offers complete kits for installation and service tasks. All parts may also be ordered separately. All parts from the accessory programme can also be installed subsequently, i.e., after purchasing a genset.

Operation, monitoring, controls

Part 1

- Sound insulation
- Expanded generator functions
- Remote control
- Current distribution and switching

1.1 SOUND INSULATION / COATINGS

Capsule material

- glass fibre reinforced plastic (GFRP)
- stainless steel (MPL)

Sound insulation materials

- 3D (thickness 25 mm)
- 4DS (thickness 40 mm)
- 6DS (thickness 60 mm)

Sound insulation / coatings

The super low-noise sound insulation system

Capsule designs

The Panda marine gensets up to 25 kW and all Panda vehicle gensets up to 12 kW are fitted with a sound insulation capsule made from glass fibre reinforced plastic (GFRP) as a standard.

Starting with the 30 kW (Marine) version or the 15 kW (vehicle) version, the capsule supplied is made from stainless steel (MPL).

Sound insulation materials

The thickness of the sound insulation material is approx. 25 mm (3D) for the marine gensets and approx. 40 mm (4DS) for the vehicle gensets. For a surcharge, the sound insulation capsules can also be supplied with a thicker sound insulation of up to 60 mm (6 DS).

Sound insulation capsule variations

The Fischer Panda sound insulation capsules are available for order either in the standard design or as a higher quality version. The following upgrade options are available:

Sound insulation capsule variations		
Standard	Upgrade options	Upgrade
GFRP 3D	GFRP 4DS	Insulation thickness 40 mm instead of 30 mm
GFRP 3D	MPL 4DS	Insulation thickness 40 mm instead of 30 mm, plus stainless steel capsule instead of glass fibre reinforced plastic capsule
GFRP 3D	MPL 6DS	Insulation thickness 60 mm instead of 30 mm, plus stainless steel capsule instead of glass fibre reinforced plastic capsule
GFRP 4DS	MPL 4DS	Stainless steel capsule instead of glass fibre reinforced plastic capsule
GFRP 4DS	MPL 6DS	Insulation thickness 60 mm instead of 40 mm, plus stainless steel capsule instead of glass fibre reinforced plastic capsule
MPL 4DS	MPL 6DS	Insulation thickness 60 mm instead of 40 mm

GFRP sound insulation capsule

MPL sound insulation capsule

Coatings

All metal capsules (MPL) can also be supplied with a paint coating. Please inquire about details if desired.

Genset with black paint job

1.2 EXPANDED GENERATOR FUNCTIONS

Expanded functions

- 24 V starter system
- 2-pole installation
- Hydraulic coupling
- Display kit
- General Signal Interface
- Electronic voltage control ("Mini VCS")

Expanded generator functions

The functions of all Fischer Panda gensets can be expanded. For this purpose, Fischer Panda offers various equipment components that can be ordered along with the genset when it is purchased.

1.2 EXPANDED GENERATOR FUNCTIONS

24 V starter system

With this starter system, all required components are designed for 24 V. Many special applications require a 24 V starter system instead of the standard 12 V starter system, which is then connected to a 24 V battery.

The system consists in a 24 V electric starter, glow plugs, and a 24 V alternator. The internal control system of the gensets, however, still runs on 12 V.

i-gensets with variable RPM

24 V starter system	
Panda 5000i	24 V electric starter, glow plug(s)
Panda 8000i - Panda 10000i	24 V electric starter, alternator, glow plug(s) *)
Panda 10000i	24 V electric starter, alternator, glow plug(s)
Panda 15000i	24 V electric starter, alternator, glow plug(s)
Panda 25i	24 V electric starter, alternator, glow plug(s)
Panda 45i	24 V electric starter, alternator, glow plug(s)

3000 RPM / 50 Hz gensets

24 V starter system	
Panda 4,5 - Pnada 10000	24 V electric starter, alternator, glow plug(s)
Panda 12000 - Panda 18	24 V electric starter, alternator, glow plug(s)
Panda 24 - Panda 30 IC	24 V electric starter, alternator, glow plug(s)
Panda 40 - Panda 100	24 V electric starter, alternator, glow plug(s)

*) Note: Not available as an upgrade kit!

1.2 EXPANDED GENERATOR FUNCTIONS

1500 RPM / 50 Hz gensets

24 V starter system	
Panda 7,5-4 Panda 9-4	24 V electric starter, alternator, glow plug(s)
Panda 12-4 - Panda 22-4	24 V electric starter, alternator, glow plug(s)
Panda 30-4 - Panda 100-4	24 V electric starter, alternator, glow plug(s)

3600 RPM / 60 Hz gensets

24 V starter system	
Panda 6500 - Panda 10 Mini	24 V electric starter, alternator, glow plug(s)
Panda 12 Mini Panda 16	24 V electric starter, alternator, glow plug(s)
Panda 22	24 V electric starter, alternator, glow plug(s)

1800 RPM / 60 Hz gensets

24 V starter system	
Panda 7,5-4 Panda 9-4	24 V electric starter, alternator, glow plug(s)
Panda 12-4 - Panda 22-4	24 V electric starter, alternator, glow plug(s)
Panda 30-4 - Panda 200-4	24 V electric starter, alternator, glow plug(s)

AGT DC gensets

24 V starter system	
AGT-DC 4000	24 V electric starter, alternator, glow plug(s)
AGT-DC 5000 AGT-DC 6000	24 V electric starter, alternator, glow plug(s)
AGT-DC 8000 - AGT-DC 16000	24 V electric starter, alternator, glow plug(s)
AGT-DC 18000 - AGT-DC 28000	24 V electric starter, alternator, glow plug(s)

1.2 EXPANDED GENERATOR FUNCTIONS

2-pole installation

With 2-pole or floating ground installations, the earth connection is established between engine starter system (electric starter, glow plugs, and alternator) and the battery when the diesel engine is started up. After the start-up process, this connection is automatically disconnected, and the system is operated as an isolated circuit. The kit consists in an insulated continuous duty relay incl. cable set and is either pre-installed on the genset or can be purchased as an upgrade kit.

21.03.03.057S	ab AGT-DC 22000	battery negative isolator Kit with cabl

Automatic start-up

With the automatic start-up function, the generator can be started with an external signal. The automatic starting procedure consists of pre-heating (heat) and operating the electric starter (start).

The automatic start-up consists in an automatic module on the remote control panel, a re-start protection, and a speed sensor.

It is possible to refit an existing remote control panel with an automatic module (see "Remote control panel").

Automatic start-up		
Series equipment	Panda 4800i - Panda 45i	incl. re-start protection, speed sensor, automatic module on remote control panel
21.02.02.120P	Panda 6500 - Panda 12000	incl. re-start protection, speed sensor, automatic module on remote control panel
21.02.02.121P	Panda 15000 - Panda 75 Panda 7,5-4/ AGT-DC 5000 and up	incl. re-start protection, speed sensor, automatic module on remote control panel

1.2 EXPANDED GENERATOR FUNCTIONS

Hydraulic coupling

for operating a pump

The electromagnetic clutch coupling in a separate housing makes it possible to connect a hydraulic pump to various Fischer Panda gensets.

3000 RPM / 50 Hz resp.. 3.600 / 60 Hz gensets

Hydraulic pump option with electromagnetic coupling				
Generator type	Voltage	Gearing	Output	Transmissible torque
Panda 8000 - Panda 15000	12 or 24 V	9 teeth (SAE A) or 13 teeth (SAE B)	20,4 kW	65 Nm
Panda 18 bis Panda 30 IC	12 oder 24 Volt	9 teeth (SAE A) or 13 teeth (SAE B)	39 kW	125 Nm

Hydraulic coupling

1500 RPM / 50 Hz resp. 1800 UpM / 60 Hz gensets

Hydraulic pump option with electromagnetic coupling				
Generator type	Voltage	Gearing	Output	Transmissible torque
Panda 7,5-4	12 or 24 V	9 teeth (SAE A) or 13 teeth (SAE B)	20,4 kW	65 Nm
Panda 9-4 Panda 12-4	12 or 24 V	9 teeth (SAE A) or 13 teeth (SAE B)	39 kW	125 Nm

options available for larger gensets upon inquiry

1.2 EXPANDED GENERATOR FUNCTIONS

Sample installation of display kit

Display kit

The display kit consists in an oil pressure gauge and a cooling water temperature gauge and sensors on the genset. The gauges are supplied as detail parts and can e.g. be installed in the control cabinet. The contact lines are routed out of the genset. Additional gauges are available upon request. Supplied without a control cabinet!

- for all gensets

VDO display kit - for all generators

21.03.06.001S

VDO 12V display kit
incl. VDO sensors on generator for oil pressure and cooling water temperature
incl. VDO gauges for oil pressure and cooling water temperature

Oil pressure gauge
(Figure similar)

Cooling water temperature gauge
(Figure similar)

General Signal Interface

Generator Signal Interface GSI

The Generator Signal Interface (GSI) controller module converts the generator signals to potential-free signals and thereby makes it possible to connect the genset to other equipment, e.g. a programmable logic controller (PLC), that can be used to control and monitor the genset.

The Generator Signal Interface is included with the genset as a detail part.

- for all AC gensets starting with Panda 8000 (3,000 RPM)
- for all AC gensets starting with Panda 6500 (3600 UpM)
- for all AC gensets starting with Panda 7.5-4 (1,500 RPM)
- for all DC gensets starting with Panda AGT-DC 5000

General Signal Interface (ready for connection)

31.41.70.023H

Generator Signal Interface box

Mini-VCS electronic voltage controller for retrofitting*)

The upgrade with a Mini-VCS converts an unregulated generator into a regulated generator. The voltage of the genset is regulated with a tolerance of +/- 3 V. This voltage stability helps protect particularly sensitive equipment (e.g. laptops, measuring instruments, navigation units, satellite).

The auto-boost function makes it possible to start up equipment with a high starter current such as electric motors, air conditioning units, and compressors without a voltage drop.

for Panda gensets

*) for ND gensets or as a spare part for gensets that with a year of manufacture older than 1997 (inquire for more information)

1.2 EXPANDED GENERATOR FUNCTIONS

Generator with hot-water connection (sample image)

Hot-water connection

The genset can be fitted with two extra connections for an external hot-water circuit. The hot water can be used e.g. for heating rooms. Water infeed (cold) and water outlet (hot) are fitted with a ball valve.

A thermostat valve is required and must be installed by the customer.

for Panda gensets

- for all AC gensets starting with Panda 8000 (3,000 RPM)
- for all AC gensets starting with Panda 6500 (3.600 UpM)
- for all AC gensets starting with Panda 7.5-4 (1,500 RPM)
- for all DC gensets starting with Panda AGT-DC 5000

Hot-water connection

upon request

Hot-water connection incl. two ball valves and non-return valve

Sample representation - The connections can also be fitted on another side, depending on the genset model.

Battery monitor

The battery monitor is used to monitor rechargeable batteries and battery banks. The battery monitor can be employed for three different voltage levels (12 V, 24 V, 48 V). For information about higher voltages, please inquire.

The battery monitor is fitted with a top-hat rail housing. The cut-in and cut-off voltage of the genset can be programmed individually.

Battery monitor

21.02.05.004H

Battery monitor RE0724 12V/24V/48V standard

Upon request

Battery monitor RE0724 72V/80V/96V/128V/144V DC

1.2 EXPANDED GENERATOR FUNCTIONS

Re-start protection

The re-start protection prevents the genset from (re-)starting while it is in use. The re-start protection thus serves to protect the electric starter from damage.

To operate an automatic system add-on for the remote control panel, it is mandatory to install a re-start protection.

The kit consists in an electronic starter monitor with bracket, a cable set, and a speed sensor.

for Panda gensets

- for AC gensets Panda 4000 - 12000 (3,500 RPM)
- for all AC gensets starting with Panda 6500 (3.600 UpM)
- for all AC gensets starting with Panda 7.5-4 (1,500 RPM)
- for all DC gensets starting with Panda AGT-DC 5000

1.3 REMOTE CONTROL

Monitoring of ^{*)}

- Engine cooling water temp.
- Winding temperature
- Engine oil pressure
- Battery charge
- 230 V AC current
- Cooling water leakage (optional)*

^{*)} in the standard version starting with Panda 6000

Remote control panels

for controlling and monitoring the Panda genset

Simple operation

The genset can be operated conveniently from the cabin with the Fischer Panda panels. It is even possible to switch multiple panels in parallel, or to operate them with a slave panel. This enables the user to operate the genset from different locations with great flexibility. One panel may be installed e.g. in the cabin and the other on the fly bridge, the trailer, or in the engine room.

Functions

The remote control panel in its standard version for Panda 5000 and up monitors six functions: engine cooling water temperature, winding temperature, engine oil pressure, battery charge, 230 V AC circuit, cooling water leakage (optional).

If any of these functions show an abnormal status, the genset will shut down. The remote control panel can be upgraded with an automatic add-on to a "fully automatic panel". That way, the genset can be started and stopped externally by contact with an external device (e.g. timer).

Standard panels for Panda 4000 gensets

Panda 4000 AC gensets

Panda P4 Control

Function: Starting and stopping the generators

Indication of: Operating hours, "Override" status (temperature error masked)

Monitoring of: Engine temperature, exhaust gas temperature, and oil pressure (warning LED).

In case of a malfunction, the panel will shut down the genset.

Custom panels

for asynchronous and AGT-DC gensets

AGT control panel

Panel with LCD display for increased functionality

The AGT control panel is fitted with a graphic display. The display serves to indicate a variety of warning and shut-down functions, which improves safety and convenience compared to a standard remote control panel.

The warning and shut-down functions can be adjusted individually. By default, the system is set so that the maximum operating safety and reliability are ensured. This means that the genset will cut off immediately if an oil pressure or temperature error is found.

Add-on modules for panel P6 Plus

Automatic system add-on module

The standard P6 Plus remote control panel can be upgraded with an automatic add-on to a "fully automatic panel". That way, the genset can be started and stopped externally with an external device (e.g. timer). The automatic starting procedure consists of pre-heating (heat) and operating the electric starter (start). The times for "heat", "start" and "stop" are individually adjustable. To operate an automatic system add-on, it is necessary to install a re-start protection.

Automatic add-on module	
21.02.02.016H	Automatic board for remote control panel P6+ (RE0703)

Automatic system add-on for panel P6+

Master/slave combinations

A master/slave combination makes it possible to operate the genset with two remote control panels. For example, the genset can be started up with one remote control panel and stopped with the other. Connecting a second remote control panel affords better control options, which will increase safety.

The main panel acts as the "master panel" to which the genset is connected. The second remote control panel - the so-called "slave panel" - works in parallel with the main (master) panel, i.e., the genset can be operated with either the main panel or the slave panel.

Panda iControl 2 remote control panel as a master/slave combination

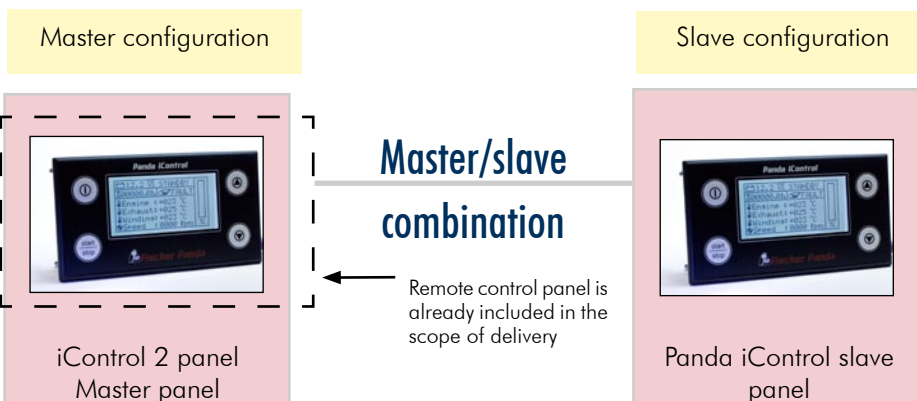

Panel iControl 2 - iControl 2 panel configuration

Up to three slave panels can be operated together with one iControl master panel.

An iControl master/slave combination consists in:

- 1 x Panda iControl remote control panel
- 1 - 3 Panda iControl slave panels

NOTE: One remote control panel is already included in the genset scope of delivery. You merely have to order the desired quantity of slave panels the plus cables (12-core).

1.4 CURRENT DISTRIBUTION AND SWITCHING

Current distribution / switching

Fischer Panda offers intelligent solutions for a safe and reliable power supply and power distribution. It is possible to expand an existing installation or to combine it with the control system of the ship or vehicle (see also our system brochure).

Current distribution and switching

- Alternating current current distribution
- Automatic shore-side power/genset switching
- Parallel service connection
- Automatic on-board monitoring

1.4 CURRENT DISTRIBUTION AND SWITCHING

AC power circuit distribution

AC circuit distribution

Ensuring a safe and reliable on-board power distribution is vital. This applies to the power supply via shore-side power, genset, and battery as well as to the distribution to on-board loads including their protection. The current distributor and its variable inputs and outputs represents the central current distribution system for your on-board power network.

AC distribution box

1.4 CURRENT DISTRIBUTION AND SWITCHING

Parallel Switching Box

The parallel switching box was designed to operate two Fischer Panda AC gensets in parallel. The unit is used to synchronise the two gensets and to switch the load from one genset to the other without interrupting the power supply. Both gensets can also run in parallel to supply twice the power. This can serve to provision a very high peak load.

Parallel switching box closed

Parallel switching box

Combinable with automatic 230 V switching unit in a single housing

1.4 CURRENT DISTRIBUTION AND SWITCHING

Automatic shore-side/generator switching unit

Automatic shore-side/generator power switch

The shore-side/genset switching unit serves to control the shore-side power in combination with a genset. The switching unit monitors the connection to the shore-side power supply. The AC genset is started up automatically when the shore-side power is not available. Once the shore-side power supply is available again, the switching unit can, if so desired, switch back so that the shore-side power is again used as the main power source.

Automatic shore-side/generator power switch

1.4 CURRENT DISTRIBUTION AND SWITCHING

Digital on-board power management (system control board)

With the digital system control board, you will discover a new dimension of digital on-board system monitoring. Modern technology is available to you at a touch with the 8.4" TFT display to switch the desired functions.

All load information such as battery capacity, current, voltage, and fuel levels are digitally displayed on the screen in the form of bar charts. Devices can be controlled with the panel, and the time indication can be adjusted to the respective time zone. Even without a display, all circuits can be controlled manually with the on-board control unit.

The basic version is fitted with 32 DC circuits, start-stop controls for the genset, and visual information on the generator status such as "AC-OK", temperature, or oil pressure faults. An upgraded version allows for camera monitoring. The operating system can be easily adapted to any ship systems and languages. With the new skipper identification system (RFID), you can protect your ship from use by unauthorised persons (optional).

System control board

Digital on-board power management

21.02.02.019S System control board SCB 32 V1.0 complete system consisting of:
Display V2.0
Power board 1 V08C/16 ports
Power board 2 V08C/16 ports
Sensor board V05.0
Digibox V01.0
Shunt 100A/60mV
Wire set 1 (connection for display, power board, sensor board)
Current impulse switch 16A 1 contact closer 12VDC series 20.21

ATTENTION !

Please provide the system voltage (12V or 24V) and the necessary symbols / sensors before delivery / order !

2. Accessory programme

Marine and vehicle applications

Part 2

- Marine installation kits
- Installation accessories
- Optional accessories
- Standard service kits
- Plus service kits

Installation kits

- Basic version
- Premium version

Complete installation kits

To keep the installation as simple as possible, Fischer Panda offers complete installation kits. The kits comprise all components that are needed for the complete installation of the cooling water, exhaust gas, and fuel systems of the genset.

Marine installation kits

The installation kits by Fischer Panda are available in two versions:

- **Basic version**

The basic version contains all components required for a standard installation

- **Premium version**

The premium version additionally contains an exhaust gas/water separator unit for greater demands concerning noise reduction. The exhaust gas/water separator unit strongly reduces the exhaust noise. The "water splash" in particular is eliminated. Additionally, the exhaust gas/water separator unit functions as an exhaust gas goose neck, which prevents the water from flowing back into the generator.

Example exhaust system installation

The basic version of the installation kit contains the following components for the cooling water, exhaust gas, and fuel installations:

Cooling water installation

- Through-hull with filter
- Seacock
- Hose connection
- Sea water filter
- Hose clamps
- Coolant hose (4m)
- Ventilation valve

Cooling water installation

Exhaust installation

- Water collector
- Hull outlet
- Hose connection
- Hose bush
- Hose clamps
- Exhaust hose (5m)
- Silencer

Exhaust installation

Fuel installation

- Fuel hose
- Hose clamps
- Non-return valve
- Fuel filter with water separator

Fuel installation

Installation kit
Basic version

Basic version installation kits

The basic version installation kits contains the following components:

Cooling water installation

- Through-hull with filter
- Seacock
- Hose connection
- Sea water filter
- Hose clamps
- Coolant hose (4m)
- Ventilation valve

Exhaust installation

- Water collector
- Hull outlet
- Hose connection
- Hose bush
- Hose clamps
- Exhaust hose (5m)
- Silencer

Fuel installation

- Fuel hose
- Hose clamps
- Non-return valve
- Fuel filter with water separator
- Fuel quick-release fasteners

Installation accessories individual components

for marine and vehicle gensets

Aside from the installation kits, the Fischer Panda installation accessories can also be ordered as individual components.

The installation accessories are available for:

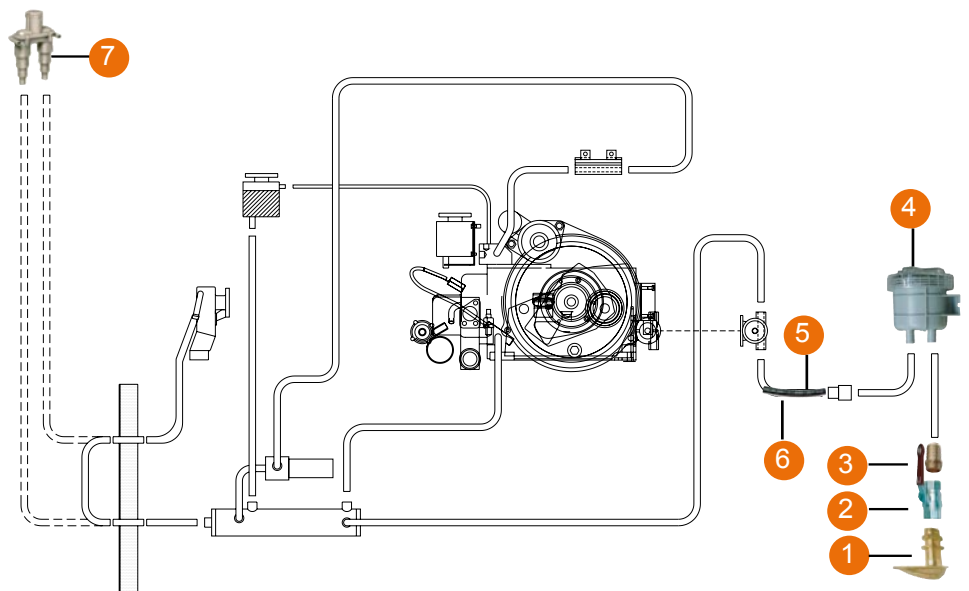

- Cooling water system
- Exhaust installation
- Fuel installation
- Attachment system

Installation accessories individual components

Cooling system for marine gensets

- 1 Through-hull with filter
- 2 Seacock / ball cock
- 3 Hose connection
- 4 Seawater filter
- 5 Hose clamps
- 6 Coolant hose
- 7 Ventilation valve

1 Through-hull with filter

Threaded coupling connected to the cooling water hose in combination with a ball valve or a hose nozzle.

Materials: brass

Through-hull with filter	
21.08.01.005H	Grated water intake, brass 1/2" external thread
21.08.01.006H	Grated water intake, brass 3/4" external thread
21.08.01.004H	Grated water intake, brass 1" external thread
21.08.01.025H	Grated water intake, brass 1 1/4" external thread
21.08.01.003H	Grated water intake, brass 1 1/2" external thread
21.08.01.024H	Grated water intake, brass 2" external thread
21.08.01.002H	Grated water intake, brass 2 1/2" external thread

Through-hull with filter

2 Sea valve / ball valve

brass, 2 x internal thread. Suitable for water and diesel.

Sea valve / ball valve	
F6AS9002501	Ball valve, hot-pressed brass up to 40 bar 1/4
F6AS9002502	Ball valve, hot-pressed brass up to 40 bar 3/8
F6AS9002503	Ball valve, hot-pressed brass up to 40 bar 1/2
F6AS9002504	Ball valve, hot-pressed brass up to 40 bar 3/4
F6AS9002505	Ball valve, hot-pressed brass up to 40 bar 1
F6AS9002506	Ball valve, hot-pressed brass up to 40 bar 1 1/4
F6AS9002631	Ball valve, hot-pressed brass up to 40 bar 1 1/2
32.10.12.002H	Ball valve up to 40 bar 2" internal thread
32.10.12.003H	Ball valve up to 40 bar 2 1/2" internal thread

Sea valve / ball valve

Hose connection

Seawater filter

Hose clamps

3 Hose connection

see "Optional accessories" page 50

4 Seawater filter

Seawater filter with transparent cover allowing for inspection of the filter without unscrewing the cover. Fast filter cleaning. Rarely requires cleaning.

Materials:

Housing = polypropylene

Filter insert = polyamide

Cover = polycarbonate

Seawater filter	
21.08.03.002H	Coolant filter 12.7mm / 1/2" FTR140/13
21.08.03.003H	Coolant filter 19.1mm / 3/4" FTR140/19
21.08.03.004H	Coolant filter 15.9mm / 1/2" FTR140/16
21.08.03.007H	Seawater filter FTR330-13 (1/2")
21.08.03.008H	Seawater filter FTR330-19 (3/4")
21.08.03.009H	Seawater filter FTR330-25 (1")
21.08.03.010H	Seawater filter FTR330-32 (1-1/4")
21.08.03.011H	Seawater filter FTR330-38 (1-1/2")

5 Hose clamps

see "Optional accessories" page 48

6 Cooling water hose with inner wire spiral, transparent

Made from transparent PVC with steel worm helix insert.
Suitable for water and waste water (suction and pressure)

Cooling water hose	
F9DWHOSE12	Water hose, clear, Vetus with worm helix DWHOSE dia. 12 mm
33.04.05.017H	Water hose clear with worm helix dia.16mm
F9DWHOSE20	Water hose, clear, Vetus with worm helix DWHOSE dia. 19 mm
F9DWHOSE25	Water hose, clear, Vetus with worm helix DWHOSE dia. 25 mm
33.04.05.015H	Water hose clear worm helix DWHOSE dia. 30mm
33.04.05.016H	Water hose clear with worm DWHOSE helix dia.38mm

Cooling water hose

7 Ventilation valve (plastic)

To avoid water ingress to the engine after it is switched off, if the genset cannot be

Ventilation valve	
F9AIRVENTV	Breather valve Airvent V (up to Panda 30)
21.08.03.001H	Breather with valve 38mm (up to Panda 30)
F9AIRVENTH	Breather valve Airvent H with valve and hose

Ventilation valve

Installation accessories individual components

Exhaust system for marine gensets

- 1 Water lock
- 2 Exhaust/water separator
- 3 Cooling water hose / exhaust hose
- 4 Hose clamps
- 5 Threaded coupling with hose connection
- 6 Sea valve / ball valve
- 7 Through-hull
- 8 Silencer
- 9 Rubber through-hull for exhaust outlet

1 Water lock / silencer

Material: made from stainless steel and sheathed in rubber.

Installation: The water lock is fitted with attachment tabs and is thus very easy to install. It is installed at the lowest point of the exhaust system.

The water lock also provides particularly good noise reduction.

Water lock / silencer	
21.08.02.012H	Water lock type Fischer Panda 160/40 connection dia.40mm
21.08.02.013H	Water lock type Fischer Panda 160/50 connection dia.50mm
21.08.02.014H	Water lock type Fischer Panda 160/60 connection dia.60mm

2 OPTIONAL: Active water lock

(Item is not included in installation kit, can be ordered as optional item.)

For difficult installation situations and/or if the genset is used with severe inclination, the use of the active water lock in combination with a follow-up control and a pump ensures the reliable emptying of the water lock, which minimises the risk of the engine being flooded.

Active water lock	
21.08.02.002H	Active water lock Fischer Panda 40-40-18

Backlash control for water collector	
31.42.02.018P	Backlash control for water collector

Electrical circulation pump	
40.07.02.009P	Electrical circulation pump type CM30P7-1 12V / 16mm connectors with DT 04-2P

Water lock

Active water lock

Exhaust/water separator

Exhaust/water separator with noise reduction coating

Exhaust hose

2 Exhaust/water separator

Material: stainless steel

The exhaust/water separator by Fischer Panda allows for the physical separation of exhaust and seawater and acts as a goose neck at the same time. Exhaust and water are evacuated separately with almost no pressure. The exhaust noises emanating from the exterior of the yacht are strongly diminished. The "water splash" in particular is eliminated. The noise reduction coating can further reduce the exhaust noise.

Exhaust/water separator

31.50.01.006H	Exhaust/water separator FP dia. 40-25-40mm
31.50.01.002H	Exhaust/water separator FP dia. 40-25-40mm, soundproof
31.50.01.005H	Exhaust/water separator FP dia. 40-30-40mm
31.50.01.009H	Exhaust/water separator FP dia. 40-30-40mm, soundproof
31.50.01.010H	Exhaust/water separator FP dia. 50-40-50mm
31.50.01.011H	Exhaust/water separator FP dia. 50-40-50mm, soundproof
31.50.01.012H	Exhaust/water separator FP dia. 60-50-60mm
31.50.01.013H	Exhaust/water separator FP dia. 60-50-60mm, soundproof

3 Exhaust hose with wire helix inside

Materials: woven rubber with wire inner helix

The exhaust hose is extremely lightweight and flexible. Bends with a radius of 2 x the hose diameter can be routed.

Exhaust hose with wire inner helix

33.04.08.003H	Exhaust hose, black with wire helix inside dia. 20mm
33.04.08.004H	Exhaust hose, black with wire helix inside dia. 25mm

32.10.12.003H	Ball valve up to 40 bar 2 1/2" internal thread

"Super Silent" exhaust hose

Hose clamps

Hose connection

Sea valve / ball valve

Brass through-hull

7 Brass through-hull for exhaust outlet

Brass threaded coupling connected to the cooling water hose or exhaust hose in combination with a ball valve or a hose nozzle.

Brass through-hull

21.08.01.005H	Grated water intake, brass 1/2" external thread
21.08.01.006H	Grated water intake, brass 3/4" external thread
21.08.01.004H	Grated water intake, brass 1" external thread
21.08.01.025H	Grated water intake, brass 1 1/4" external thread
21.08.01.003H	Grated water intake, brass 1 1/2" external thread
21.08.01.024H	Grated water intake, brass 2" external thread
21.08.01.002H	Grated water intake, brass 2 1/2" external thread

Marine silencer

8 **OPTIONAL:** Silencer

(Item is not included in installation kit, can be ordered as optional item.)

see "Optional accessories" page 47

Rubber through-hull

9 **OPTIONAL:** Rubber through-hull with external mirror for exhaust outlet

(Item is not included in installation kit, can be ordered as optional item.)

Simple and flexible installation. The element can also be adjusted to the curved ship's side wall. From the outside, the through-hull is covered with a stainless steel rosette. For the installation of the exhaust hose, a hose connection is required (for hose connector, see "Optional accessories" on page 54).

33.04.05.014H	Coolant water hose type DIN 73411 NW dia. 40mm

9 Hose clamps

see "Optional accessories" page 52

10 Silicone exhaust hose

The silicone hose is flexible, low-noise, temperature resistant to 280 °C, and heat-insulated. Vibration noise is being compensated for.

Silicone hose	
33.04.03.005H	Silicone web hose, inside diameter 40 mm, max temperature 280°C
33.04.03.012H	Silicone web hose, inside diameter 30 mm, max temperature 280°C
33.04.03.014H	Silicone web hose, inside diameter 50mm

Installation accessories individual components

Marine and vehicle fuel systems

- 1 Fuel hose
- 2 Fuel filter with water separator
- 3 Non-return valve
- 4 Hose clamps
- 5 Fuel quick-release fasteners

Fuel hose

Fuel filter with water separator

Non-return valve

1 Fuel hose

Material: oil-resistant rubber compound. With synthetic woven inlay.
Temperature range: -30 °C to +100 °C continuous operation

Fuel hose	
33.04.07.003H	Fuel hose ISO 7840 A1 dia. 5mm

2 Fuel filter with water separator

Fuel filter with water separator	
36.01.02.020H	Vetus WS 180

Replacement element	
36.01.02.021H	Plastic bowl, clear, for fuel filter type RACOR 120A

3 Non-return valve

If the fuel tank is to be installed above the level of the generator, then a non-return valve must be installed in the fuel return line to ensure that no fuel is fed into the injection pump via the return line.

Non-return valve	
21.09.02.007H	Non-return valve, aluminium, inner dia. 6mm
21.09.02.005H	Non-return valve, aluminium, for hose dia. 8mm
21.09.02.008H	Non-return valve, plastic, inner dia. 8mm

4 Hose clamps

see "Optional accessories" page 52

5 **OPTIONAL:** Fuel quick-release fasteners

Allows to disconnect hoses easily. Aside from the coupling and the nipple, hose adapters and copper rings are required for attachment to the fuel hoses.

Fuel quick-release fasteners	
32.21.20.003H	Self-sealing coupling, female type brass, with external thread 1/4"
32.21.20.004H	Self-sealing coupling, male type brass, with external thread 1/4"

Hose adapter	
31.20.03.016H	Hose adapter with internal thread 1/4" d 5.5 D 8mm

Copper ring

Coupling quick-release fastener

Attachment system

for marine and vehicle gensets

- Shock-mount, captive
- Shock-mount, non-captive
- Shock-mount, captive

Shock-mount, captive

The captive shock-mounts are suitable for marine and vehicle gensets. They absorb the vibrations of the generator, thereby minimising the noise, and the generator is secured against slipping or breaking off.

For item numbers for the corresponding gensets, please refer to the reference table.

Shock-mount, captive	
32.30.01.011H	Rubber mounts type FPB 110/50
32.30.01.012H	Rubber mounts type FPB 110/60
32.30.01.013H	Rubber mounts type FPB 150/40

F9DEMPMP045	Exhaust silencer, Vetus MP45
F9DEMPMP050	Exhaust silencer, Vetus MP50
F9DEMPMP060	Exhaust silencer, Vetus MP60
F9DEMPMP075	Exhaust silencer, Vetus MP75
F9DEMPMP090	Exhaust silencer, Vetus MP90
F9DEMPMP100	Exhaust silencer, Vetus MP100

OPTIONAL: Muffler for vehicle gensets	
31.06.02.022H	exhaust muffler Ø40mm, dry and oval with bracke

Marine silencer

Vehicle muffler

Hose clamp

Hose clamps

Worm gear SX hose clamp

The SX clamp with a 9 mm wide strap as per DIN 3017 The clamp is supplied in its standard version with a 7 mm hexagon screw head, WAF 7. Standard diameters range from 8 mm to 110 mm. The clamping space ranges up to 20 mm.

Hose clamps	
32.03.01.002H	Hose clamp with worm helix DIN 3017 dia. 8-16mm, width 9mm
32.03.01.004H	Hose clamp with worm helix DIN 3017 dia. 12-22mm, width 9mm
32.03.01.005H	Hose clamp with worm helix DIN 3017 dia. 16-27mm, width 9mm
32.03.01.006H	Hose clamp with worm helix DIN 3017 dia. 20-32mm, width 9mm
32.03.01.007H	Hose clamp with worm helix DIN 3017 dia. 25-40mm, width 9mm
32.03.01.008H	Hose clamp with worm helix DIN 3017 dia. 32-50 mm, width 9mm
32.03.01.009H	Hose clamp with worm helix DIN 3017 dia. 40-60mm, width 9mm
32.03.01.010H	Hose clamp with worm helix DIN 3017 dia. 60-80mm, width 9mm
32.03.01.011H	Hose clamp with worm helix DIN 3017 dia. 90-110mm, width 9mm
32.03.01.020H	Hose clamp with worm helix DIN 3017 dia. 20-32mm, width 12mm
32.03.01.021H	Hose clamp with worm helix DIN 3017 dia. 25-40mm, width 12mm
32.03.01.022H	Hose clamp with worm helix DIN 3017 dia. 32-50 mm, width 12mm
32.03.01.023H	Hose clamp with worm helix DIN 3017 dia. 40-60mm, width 12mm
32.03.01.024H	Hose clamp with worm helix DIN 3017 dia. 50-70mm, width 12mm
32.03.01.025H	Hose clamp with worm helix DIN 3017 dia. 60-80mm, width 12mm

Hose clamps	
32.03.01.026H	Hose clamp with worm helix DIN 3017 dia. 80-100mm, width 12mm
32.03.01.027H	Hose clamp with worm helix DIN 3017 dia. 90-110mm, width 12mm
32.03.01.028H	Hose clamp with worm helix DIN 3017 dia. 110-130mm, width 12mm
32.03.01.029H	Hose clamp with worm helix DIN 3017 dia. 120-140mm, width 12mm

Hose clamp

Jointed bolt clamps as per DIN 3017

are characterised by their extremely high clamping forces. The jointed bolt clamp installs effortlessly with manual, pneumatic, or electric standard tools.

Materials: strap: stainless steel 1.4510 / clamp head parts: galvanised steel up to 20 mm

Hose clamps

Oilmaster electrical oil change pump

Makes oil changes clean and convenient

The electrical 12 VDC Oilmaster pump can be permanently installed or used as a portable unit. As standard, the cables are fitted with alligator clips and can be connected directly to the ship/vehicle battery. The pump works bi-directionally, i.e., it can suction off the used oil and then feed in fresh oil in the opposite direction.

All Panda gensets are equipped with a connection line on the oil pan for connecting the Oilmaster pump.

It is also possible to supply several engines simultaneously. For this purpose, the suction/pressure connection of the pump can be fitted with as many branches as desired by using a distribution station.

The electric pump of the Oilmaster is self-priming and allows for a delivery head of up to 0.5 mm. The Oilmaster is thus suitable for any engine system and is ideal for yachts and vehicles with gensets where the oil connection is difficult to access.

The Oilmaster facilitates a regular oil change and helps operate the engine with consistently clean and pure engine oil.

Standard service kits

- Standard kits 1 to 10

Plus service kits

- Plus kits 1 to 20

Service kits

Service kits - original parts only

The Fischer Panda service kits are designed for the routine service tasks.

The service tasks described in the genset manual can be performed by the operator unless highlighted differently in the manual. Additional maintenance work must be implemented by specially trained technical personnel or by authorised workshops (Fischer Panda Service Points), only. This applies in particular to valve adjustments, work on the diesel injection system, and to engine repairs.

The Fischer Panda service kits contain only original genset spare parts.

Standard service kits

Standard service kits 1 to 10

The Fischer Panda service kits contain original genset spare parts. The kits are designed for the routine service tasks.

Plus service kits

Plus service kits 1 to 20

The Fischer Panda service kits contain original genset spare parts for routine service tasks and all parts for the initial 600 h service intervals.

The Fischer Panda Plus service kits are supplied in a convenient water-proof plastic box.

Standard service kits

Standard service kits 1 to 10

The Fischer Panda service kits contain original genset spare parts. The kits are designed for the routine service tasks.
